Welcome Message:

Pain is the most common symptom encountered in our day to day practice, hence recognised as the fifth vital sign. Department of Pain medicine and Anesthesiology, KIMS hospitals provides the most advanced evidence based effective treatment options for both acute and chronic pain.

This conference provides complete knowledge on Ultrasound guided interventional pain procedures by local and national faculty. This workshop is apt for budding anesthesiologists and pain physicians as it provides complete hands-on experience in regional anesthesia and chronic pain interventions on volunteers and needling experience on "CADAVERS". We promise to provide wonderful learning experience.

Patrons for the workshop

Patron

Dr. Bhaskar Rao
